To Whom It May concern

Dear sir/ madam...

The State Institution “Institute of Pediatrics, Obstetrics and Gynecology named after Academician OM Lukyanova of the National Academy of Medical Sciences of Ukraine” is a leading health care institution of Ukraine that provides highly qualified medical care to all pregnant women of reproductive age, critically ill pregnant women, mothers with cancer, newborns, children from all over Ukraine, as well as the territory of military action, and in fact is the last link in providing such assistance in Ukraine.

Due to the war situation in our country and the extreme conditions in which we have to help our newborns and their mothers today, we would like to ask you for humanitarian aid that would provide us with the necessary medical equipment.

For intensive phototherapy in NICU or the management of jaundice in newborns, we need special equipment for the possibility of its use in adapted premises during active hostilities. Please send us 60 bili-huts™ and 60 bili-rulers™. As I am the President of the Association of Neonatologists of Ukraine, there is an opportunity to transfer this equipment to other perinatal centers of Ukraine, which are in the zone of active hostilities.

On behalf of the Ukrainian people, we thank you in advance for help given to us.

Sincerely,  
President of the association  
of Neonatologists of Ukraine

T.K. Znamenskaya
